

## PRESERVATION VIRGINIA

### **Statement from Elizabeth S. Kostelny, Executive Director, APVA Preservation Virginia**

"Forty years ago, non-profit or public ownership was the only confident alternative to ensure preservation of historic sites. Today, protective easements and covenants provide for the preservation of our significant assets. APVA Preservation Virginia recognizes that the future of preservation is in finding uses for these structures in the context of contemporary life. What better preservation message than honoring Carter's Grove with a return to its intended use.

Colonial Williamsburg continues to be a consummate steward of some of our nation's most significant structures and collections. By confronting the realities of preservation in the twenty first century, Colonial Williamsburg is once again demonstrating its leadership."

Elizabeth S. Kostelny
